## PROJECTS

### Video Chat – Topic

- Created a website based on Gatsbyjs framework and the majority of web app functionalities powered by Reactjs framework.
- Designed the architecture of the project based on WebRTC technology. Got to know common tools like Twilio Programmable Video.
- Worked in a team, organized work and expanded my knowledge of Git version control and common practices.
- Designed and prototyped responsive web and mobile app. Learned a lot of good practices on UI/UX and got to know tools like Figma, Adobe XD and Photoshop better.
- Learned new good coding practices, code optimisation and unit testing using Jest.js.
- Experienced problems that go with developing a commercial size project.

### Company website

- Worked with the client, gathered expectations about appearance and functioning of the website.
- Full site construction, went through: design, development and deployment stage.
- Implemented content management system using GraphCMS. Got to know GraphQL better by using it for API queries.

### Portfolio SPA

- Created a responsive project of the website using Adobe XD and Photoshop.
- Gained more knowledge on Gatsbyjs framework, anime.js library and website optimisation for loading time, good practices and SEO.
- Used MongoDB and GraphQL to provide content for dynamic subpages.

## SKILLS

### Frontend

ES6  
HTML/CSS  
SCSS  
React  
Redux  
Vue.js  
Gatsby  
RWD  
DevTools

### Backend

Node.js  
Express  
REST API  
GraphQL  
MongoDB

### Design

Adobe XD  
Adobe Photoshop  
Figma

### General

Git  
Linux

## EMPLOYMENT

### Euronet internship

March 2018, Łódzkie, Radomsko  
DevOps intern

Windows and Linux Debian based servers maintenance. Work with client, computer diagnosis and repair.

## EDUCATION

### ZSE-E w Radomsku

2016–2020, Łódzkie, Radomsko  
ICT engineering  
Scholarship “Zawodowcy w Łódzkiem”  
in 2019/2020

### WIT Warsaw school of Information Technology

2020 – present  
IT Management Techniques  
Non Stationary Engineering Studies
